SUMMARY

Backend engineer with 7 years of experience designing and scaling Python-based REST services on AWS, with strong ownership of system design and production reliability.

SKILLS

Python, FastAPI, Flask, PostgreSQL, SQL, AWS (EC2, S3, Lambda, RDS), Docker, Kubernetes, Git, CI/CD (GitHub Actions), pytest, unit testing, integration testing, system design, distributed systems, Kafka, Redis, Terraform, REST APIs, agile/scrum, mentoring

EXPERIENCE

Senior Backend Engineer, Nimbus Cloud Systems (2021 - Present) [4 years]

- Designed and owned REST APIs in FastAPI powering a multi-tenant SaaS product
- Ran PostgreSQL query optimization that cut average response times by 35%
- Deployed and scaled services with Docker/Kubernetes on AWS (EC2, Lambda, RDS)
- Set up CI/CD pipelines with pytest-based test suites; maintained on-call rotation
- Introduced Redis caching and Kafka event streaming; mentored 2 junior engineers

Backend Engineer, Vertex Retail Tech (2018 - 2021) [3 years]

- Built Flask microservices and PostgreSQL data models for an order-management system
- Provisioned AWS infrastructure with Terraform

EDUCATION

B.Tech in Computer Science, PES University, 2018

Total years of professional experience: 7 years
